* SEEDS, *

As Grown and Supplied by

SETH WYMAN FIFE & SON, Proprietors,

E. W. BURBANK SEED CO.,

FRYEBURG, ME.

TO THE PUBLIC.

The take great pleasure in presenting to you our Annual Catalogue for 1897.

We have come to stay and ask the good will and support of all in need of good reliable seeds for the farm and garden

A good garden depends upon the condition of the soil, and a good gardener. We take the best care and pains in selecting and putting up our seeds, and know that they are all right for our New England climate. Do not fail to try them.

Seeds are not warranted, but with proper treatment and care will thrive.

We ship by mail, express or freight as desired. mail add eight cents per pound for postage. All goods are delivered to express companies or railroad without charge for cartage. Packets mailed free on receipt of Catalogue price.

Boxes, Bags and Barrels charged at cost.

Send money by Postal Note, Post Office Money Order, Express Money Order, Personal Checks on Banks in New England, or Certified Cashier's Bank Drafts or registered letter.

If your order is not received in a reasonable time, write us and send duplicate order and say how you sent the money.

Orders will be filled in order and promptly.

Write your Name and Address plainly so that no mistake can be made.

Yours truly.

SETH WYMAN FIFE & SON PROPR'S.

E. W. BURBANK SEED CO..

FRYEBURG, ME.

HOW TO HAVE A GOOD GARDEN.

EARLY all farmers fall into the common error that they can do all of their farm work and after the hurry of their spring's work is over they can sow a garden and have the seeds come up well and grow good vegetables.

Here is where they make a mistake. All garden seeds, as well as other crops, should be sown in season.

To raise good vegetables the ground should be highly manured in the fall, and the manure and soil thoroughly mixed and pulverized. Onions should be sown as early in the spring as it is possible to work the ground. culture is the best, the old method of bedding up is wrong; it is more work and causes the ground to dry up. Beets should be sown quite early, while the ground is cool and moist, if sown on ground that holds its moisture well cover one inch deep, on dry ground one and one-half inches deep. Beet seed has a hard nut-like shell, and if there is not moisture enough to soften this shell it will fail to come up. Parsnips as well as beets, should be sown early. Sow on ground that was well manured the year before, as freshly manured ground causes them to grow ill-shaped. Cover the seeds one-half inch deep. Carrots can be sown any time in the month of May, but it is better to sow before the ground gets hot and dry. Carrot seed is slow to come up, and should be sown on ground as free from weeds as possible. turnips do the best on newly broken up ground. Plant cabbage in hills two and one-half feet apart, and three feet between rows; use a shovelful of fine manure in the hill with a small handful of superphosphate. Turnips want about the same treatment as cabbage, but can be planted nearer together. Cucumbers, squashes and all members of the vine family, do the best on newly broken up ground. Plant cucumbers in hills four feet, apart and use good fine manure in the hill. When they first come up dust with plaster when the dew is on. When the vines commence to bear, if you want them to bear well, see to it that no cucumbers are allowed to go to seed on them. Squashes require more manure than cucumbers; the ground should be well manured broadcast.

With these few hints that we have given as to the proper way to grow good vegetables, don't forget that you have got to put in the amount of labor and brains to suit the occasion. We also beg leave to call the attention of all sowers of Garden Seeds to the following: Please don't lay all the ills that befall the vegetable kingdom at the door of your Seedsman. There is no doubt that we shall have enough to answer for. Remember the following facts, that your Seedsman does not manure your ground, he has no control over the weather, he cannot make the rain fall or the sun shine. And last of all he has no control over the millions of insects that invest our land. Nothing but eternal vigilance on the part of the cultivator can beat them.

VEGETABLE SEEDS.

BEANS—Dwarf or Bush.

Plant as early in the spring as the season will admit on account of frost. Beans are very tender and are killed by frost. Plant in drills about two inches deep, and from eighteen inches to two feet apart, if the soil is not rich use good fine manure in the drills, with a liberal quantity of superphosphate. If you want them at all seasons make a succession of sowings from May to July.

One quart beans for one hundred feet of drill.			277	
	Pkt.	Qt.	Pk.	Bu.
Early Valentine. Early, propuctive, tender succulent				
and of excellent flavor. A good bean for the first				
crop	.IO	.20	\$1.00	\$4.00
Dwarf Black Wax. One of the best varieties; the pods				1111111
when ripe are a waxy yellow, very tender and rich				
when cooked. Very popular	.10	.25	1.75	6.co

Low's Champion. Early, hardy, thrifty and enormously				
productive; it also combines extreme tenderness and de-				
licious flavor, and being absolutely without strings to				
the pods it excells every other variety as a snap or				
string bean. As a shell bean it has but few equals				
and is of splendid flavor when cooked dry	.10	.20	\$1.25	\$4.00
Early Long Yellow Six Weeks. Hardy and prolif-			, 0	
ic	.Io	.20	1.00	4.00
Golden Eye Wax. Rust proof, very hardy and prolif-				
ic	.IO	.20	1.25	4.00
Improved Yellow Eye. For field culture			.85	
Horticultural Dwarf. Large and very productive; pods			O	0
showy; great favorite in New England, and fine shell				
variety		.20	1.00	3.75
Curries' Rust Proof Wax. For earliness, productive-				5.75
ness, freedom from blight or rust and all around good				
points it justly belongs at the head of the list of the				
wax varieties. Pods long, flat, tender and fine quality	.10	.30	T.75	6.00
Henderson's Bush Limas. This is a bush variety of		-5-	75	
the small Lima, a very rich, luscious Bean, that has				
the advantage of not repuiring poles to run on, while				
it comes earlier into bearing. The bush Limas are				
now very popular.	. 10	.30	T.75	6.00
Dwarf Lima Wax. A new Lima introduced by the		.50	2.73	0.00
Cleveland Seed Co., to the trade, and new to the pub-				
lic for the first time. A very fine bean and very desira-				
ble in the garden.	. 10	.50	2.00	10.00
The first of the same of the s		.50	3.00	.0.00

BEANS-Pole or Running.

These are more tender, and require richer ground and more care in culture than the bush beans; they succeed best in sandy loam. Plant in hills three feet apart and three and one-half feet between rows, use a shovelful of old fine manure in the hill. Plant from six to eight beans in a hill.

One quart will plant one hundred and fifty kills; ten to twelve quarts to the

acre.				
cá. os.	Pkt.	Qt.	Pk.	Bu.
Horticultural or Speckled Cranberry. A good variety				
for private use; a good snap or shell bean	.IO	.20	\$1.00	\$4.00
Indian Chief or Black Wax Bean. One of the best				
varities, either for a snap or shell; remarkable for				
its fine, tender and rich colored pods. Very produc-				
tive	.IO	.25	1.75	7.00

BEETS.

The soil for beets should be very rich, a light sandy loam made rich is the best. Sow as early in the spring as the ground is fit to work, frost does not hurt beats. For late sowing soak the seed in warm water twentyfour hours, sow in drills fourteen inches apart; the first weeding thin out to four or five inches apart. Pull in the fall before they get a hard frost on them. Store for winter use in barrels with five or six inches of sand on top in a cool cellar just above the freezing point.

If sent by mail in quantity of one-half pound and upwards, add eight cents per pound for postage.

One ounce to fifty feet of drill; six pounds to the acre.

9	Pkt.	Oz.	$\frac{1}{4}$ 1b.	Lb.
Dirigo. Extra early; one of the earliest	.05	.15		
Eclipse. A new variety; a good variety for second				
early. Grows larger than the Egyptian, dark blood				
red, fine grained and very tender	.05	.IO	.20	.60
Egyptian Blood Turnip. Very early and of rapid				
growth. A good beet for early market				
Early Flat Bassano. A good variety of quick growth	.05	.IO	.20	.60
Early Blood Turnip. An old standard table beet.				
Flesh dark blood red, fine grained and very tender	.05	.IO	.20	.60
Edmand's Early Turnip Beet. This fine new variety				

grows but very small tops, the short foliage being of a rich bronzy red. The beets are of a handsome round shape and very smooth, the skin being of a deep bloodred color; the flesh is also a very dark red, and remarkably sweet and tender. One of the finest table beets				
grown. Dewing's Blood Turnip. A large deep red beet of good		.IO	.20	.60
quality; a good market beet	.05	.10	.20	.60
to a large size Lentz Extra-Early Turnip. A large, small-top, round	.05	.IO	.20	.60
beet; fine strain		.Io	.25	.75
sively for its leaves; the middle of the leaf can be used and served like Asparagus, the rest of the leaf like Spinach. Pick the leaves and others come out from				
the stock. Excellent greens			.25 1 1b.	
productive variety, good for feeding stock		·10	.15	•35

CABBAGE.

The Cabbage is one of the most largely grown of vegetables in cultivation. Plant in newly broken ground well manured broadcast. Use a shovelful of old fine manure in the hill with a haudful of superphosphate. Plant in hills two and one-half by three feet for the large kinds, and one and one-half by two feet for the smaller kinds. The crop is much improved by frequent hoeing.

One ounce will produce about 3000 plants.

			_	
	Pkt.	Oz.	$\frac{1}{4}$ 1b.	Lb.
Early Jersey Wakefield. An early standard cabbage	0.5	20	••	
in the large markets	.05	.20	.50	1.75
Henderson's Early Summer. It is the earliest of all				
the large cabbages; heads of a large size and very				
solid	.05	.20	.65	2.00
All Seasons. This fine variety is large, solid and sure				
to head. One of the best cabbages either for early or				
late crops as it comes to a head early and keeps well				
during the winter	05	20	FO	7 75
9	.05	.20	•,50	1.73
Early Winningstadt. Heads, large cone-shaped and				
very solid; sure to head; a good kind to plant in light				
soil		.20	.50	1.50
Fottler's Improved Brunswick. One of the best drum-	-		-	,
head cabbage in cultivation sure to head grows to a				

2				
large size and very solid	.05	.20	.50	1.75
Improved American Savoy Drumhead. Very sweet				
and tender; good sized, firm heads; a good cabbage for family use	.05	-20	65	2.00
Stone Mason Drumhead. Standard variety, Large solid, tender and excellent winter cabbage; extra fine	,00	.20	.03	2.00
-home grown stock	.05	.20	.60	2.00
World Beater. A new cabbage as large or larger than	_			
Marblehead Mammoth, yet uniform in size and true				
to type, and a very solid header	.05	.20	.70	2.25
Mammoth Rock Red. This fine new Cabbage originated				
with a grower for the New York market. It is the				
largest Red Cabbage known; the heads will average				
over ten pounds each, and are always of a deep red				
color inside as well as outside, while they are almost				
literally as hard and solid as a rock; highly recom-				
mended	.05	.25	.75	3.50

CARROT.

The Carrot wants rich sandy loam, deeply tilled. Sow quite early in spring in drills 14 inches apart and keep as free from weeds as possible. If for table use, thin them out to three or four inches in the row. If grown for stock they do not require to be thinned out.

One ounce to one hundred feet of drill; three to four pounds to the acre.

\cdot	Pkt.	Oz:	$\frac{1}{4}$ 1b.	Lb.
Improved Long Orange. An improvement on the Long			*	
Orange; decidedly superior to any other sort of Orange				
Carrot, being larger, better flavored, and surer to pro-				
duce a crop	.05	.IO	.25	.75
Danver's 1-2 Long. A new variety; grows shorter than Long Orange; much easier to pull and grows very				
handsome.	.05	.IO	.25	.75
Improved Short White. The largest and heaviest cropping Carrot known; the roots are short, very heavy at the shoulber; of uniform shape and smooth light green color above ground, white beneath; flesh				7
rich, white, solid, crisp, and of sweetest flavor	.05	.IO	.20	.75
Oxheart. Very thick and short, fine grained and sweet	.05	.10	.20	.75

CAULIFLOWER.

Any soil that will grow early Cabbage will grow Cauliflower, as their requirements are almost alike. The seeds may be sown in the hot-bed in March or April, and transplanted about the first of May.

One ounce will produce about 3000 plants.

Henderson's Early Snowball. One of the early sorts		1.75
Early Favorite. This is a new variety in this country,		
and is, we think, the best early large growing kind.		
Try it	.10	1.00

Pkt Oz

CELERY.

Sow early in hot beds or in boxes in a warm room. When Plants are two inches high transplant into open ground four inches apart; when six or eight inches high transplant again into trenches four feet apart and eight inches apart in row. Dig the trenches ten inches deep, fill in six inches of old fine manure and mix thoroughly with the soil in bottom of trench. Earth up to blanch three or four times during their growth; no earth should be thrown into the center of the plants.

One ounce of seed produces some 4000 plants.

	Pkt.	Oz.	₹1b.	Lb.
Boston Market. It is large, a vigorous grower blanch-				
es easily, pure white, solid, crisp, tender, and excell-				
ent in all other respects	.05	.25	.75	\$2.50
Henderson's White Plume. Crisp, and possessing a				
sweet nutty flavor; a valuable sort for family use	.05	.25	.75	2.50
Giant Golden Heart. A selection from Dwarf Golden				
Heart, which it resembles, but grows larger and is a				
better keeper; a favorite with gardeners	.05	.25	.75	2.50
		¼1b.	₹lb.	Lb.
Soup Celery. Seeds for flavoring soups, pickles, etc.		.IO	.25	.40

CRESS or Peppergrass.

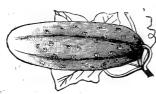

Used as a salad in connection with Lettuce. The leaves are frilled and curled on the borders, of a deep green color and have a warm pungent taste. Sow early in spring in drills ten inches apart in good rich soil and cover lightly.

Pkt. Oz. ½1b. Lb. Cress.05 .10 .15 .5e

CORN-Sweet.

cream white kernel, sweet and juicy. Looks nice on the table; has no objectionable look like the Cory and Marblehead corn with a red kernal and cob. Ears grow to be a good size, uniform in shape, has no objectionable look like other kinds of early corn with short stubby				
ears	.IO	.15	1.00	3.00
Stowell's Evergreen. A late variety of excellent quality, remaining longer in the green state than any other				
kind	.05	.15	1.00	3.00
Black Mexican. Grain bluish black, but is especially rich in sugar qualities	05	7.5	T 00	2.00
Tien in sugar quantites	.05	.15	1.00	3.00
CORN—SWEET FODDER.				
For Soiling. Sow three bushels to an acre broadcast; in drills one and one-half bushels		.10	.50 .40	1.50 1.50
POP CORN.				
$\Delta u = 2 \pi a$		Far	. Pkt	Ot
Tatooed Yankee. Very early and exceedingly productive; rich, sweet and tender; one of the very best poppers. Rice. Yellow color and a good producer and popper.	-		.IO	.25

CUCUMBER.

Plant as soon in spring as danger of frost is over, and the ground warm and mellow, in hills five feet apart each way, and cover one-half inch deep. Thin to four of the strongest plants in a hill.

One ounce to 50 hills

One ownce to 50 mills.				
	Pkt.	Oz.	11b	Lb.
Early Russian. The earliest variety in cultivation	.05	.Io	.25	.75
Arlington White Spine. This variety of cucumber is one of the finest we have seen, being remarkable for				
'evenness of size, fine form, and dark green color	.05	.1o	.25	.60
Chicago Pickling. Good size, and a good pickler	.05	.Io	.25	.60
White Wonder. This variety surpasses the famous White Pearl in quality and productiveness, and is hardier fruit; an ivory white from time of forming until				
fully ripened	-05	.10	.25	.60
Boston Pickling. An early table variety, producing its fruit in clusters near the root of the plant. Skin green, prickley; flesh white, tender and well flavored	.05	.Io	.25	,60
Early White Spine. One of the best table sorts, and popular with market men on account of its color, which is light green, turning white instead of yellow when ripe. It is of uniform good shape, medium size, tender		6		
crisp and well flavored. Good variety for forcing	05	oI.	.25	.60

Improved Long Green. About one foot long, tapering at the ends. Very dark green in color. Flesh crisp and of good flavor, and less seedy than many other sorts. One of the best sorts for pickling	.05	.10	.25	.60
Early Green Cluster. An early table variety, produc-				
ing its fruit in clusters near the root of the plant.				
Very productive, and in earliness next to the Russian.				
Skin green; prickly; flesh white, tender and well				
flavored	.05	.IO	.25	.60
Nichol's Medium Green. Of medium size, smooth	Ü			
straight and very productive	.05	.IO	.25	.60

reliable as a green pickler	.05	.IO	.25	.60
Early Frame. Early and productive; about 5 inches long.			.25	
Larry Frame. Early and productive, about 5 inches long.	.05	.10	.25	.00

DANDELION.

Improved Large Leaved. Used for greens and consider-				
ed very wholesome. Sow in May or June in drills half				
inch deep and 12 inches apart. The plant will be ready				
for use the following spring	.IO	.50 I	.65	5,50
One ounce to 150 feet of drill.				

ENDIVE.

LEEK. (Lauch.)

The Leek is generally considered superior to the Onion for soups; it is very hardy and easily cultivated. Sow in drills, a foot apart, in April, and transplant in July in rows fifteen inches apart and six inches from plant to plant. They should be set five inches deep, in rich moist soil.

One ounce will produce about 1000 plants. Pkt. Oz. Lb. London Fiag. Hardy, useful sort for general use....... .05 .25 \$2.00

LETTUCE.

In the Northen States, sow in seed bed as early in spring as the ground can be worked, and at intervals thereafter. When plants have made two or three leaves, transplant into rows fifteen inches apart and one foot apart in the row. For early forcing, sow in hot-bed from commencement to the middle of winter.

One ounce to 120 feet of drill.

Tennis Ball. The best Lettuce in cultivation for family use. Early, extremely tender and crisp, and remains

Prize Taker. A very large yellow globe Onion, very				
handsome, fine flavor, and grand sort for market. Im-				
mensely productive, producing 700 bushels to the a-				
cre, and is claimed by the introducer to be the largest,				
handsomest, finest flavored yellow globe Onion ever				
introduced It is a good keeper, remaining hard and			***	
firm untill Spring.	.05	∙35	.70	2.50
New White Aeriatic Barletta. The earliest and one of				
the handsomest and smallest onions grown; one of the				
best for pickling and also valuable for early bunching.				
Top or Button Onions.	20 C	ents	per q	uart.
Add ten cents per quart if sent by mail				

PARSLEY.

Parsley requires rich, mellow soil; sow thickly in drills, one foot apart and one-half inch deep. As the seed germinates slowly, it is best to soak it for a few hours in tepid water before sowing. For winter use protect in a glass frame or light cellar.

One ounce to 150 feet of drill.	Pkt.	Oz.	<u>₁</u> 1b.	Lb.
Extra or Double Curled.	.05	.10	.25	.75
Fern Leave.				

PARSNIP.

Sow as early in the spring as the weather will admit, in drills fiften inches apart, covering half an inch deep. When well up thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frosts, and it is usual to take up in the fall a certain quantity for winter use, leaving the rest in the ground untill spring, to be dug up as required.

One ounce to 200 feet of drill, five pounds to the acre. If sent by mail in quantities of one quarter of a pound and upwards, add eight cents per pound for postage.

Abbott's Improved or Long Smooth,	Pkt.	Oz.	$\frac{1}{4}$ lb	Lb
Best for General use	.05	.Io	.20	.50
general use, New	.05	.10	.25	.75

Peas for an early crop. Should be sown as soon as the ground is in working condition.

The soil for their reception should be light dry, and well sheltered. Mild manure, such as leaf mould, has a beneficial effect; but for many of the varities, the soil cannot be too rich. For general crops, the ground should be well manured the previous year, which causes them to yield more abundantly. When grown as a market crop, peas are never staked, and are sown in single rows, two or three inches deep, and from two to three feet apart, according to the variety or strength of the soil, When grown in small quantities for Private use, they are generally sown in double rows, six inches apart, and the tall varities staked up by brush.

One quart to 75 feet of drill; two to three bushels to acre.

Peas ordered by mail are subject to an extra charge of fifteen cents per quart for postage. Pints furnished at quart rates.

Extra Early.

* indicates wrinkled sorts.				
Cleaveland's Early. The earliest pea known, being very uniform in growth and ripening two days earlier than Rural New Yorker, and 90 per ceut. of the pods can be gathered at first picking. The dark green color of the pods makes it extremely desirable, as it can be carried long distances without loosing color, white which quality, combined with its earliness and uniformity of ripening, makes it the most desirable extra early pea for market gardeners ever offered. Seed round, green, resembling Kentish Invicta; height two		Qt.	Pk	Bu.
feet	.10	.20	1.00	3.50
known to the trade in this country except the Alaska. Pods of fine shape, lerger and better filled than any other extra early; containing from six to nine peas of				
fine nuality; height $2\frac{1}{2}$ feet.			1.25	
Maud S. Very early, productive, round, white pea, $2\frac{1}{2}$ ft.		,20	1.00	3.50
*Cleveland's Eclipse. This has been named the (Eclipse) for the simple reason that it Eclipses the well known American Wonder, Alaska, Rural New Yorker, or any other known pea on record in point of earliness. Vine two feet high and vigorous. Seed green, wrinkled, smaller than American Wonder and most delicious flavor. Pods true American Wonder in shape and size. Owing to earliness, productiveness, size quality and height of vine, this is destined to be the coming canning pea of America, as well as the truck and kitchen garden. Don't fail to try it. Pint 50 c., Qt. 75 c. Improved Daniel O'Rourke. A favorite early variety; and a good bearer; 3 feet			1.00	2.50
*Bliss' American Wonder. One of the earliest wrinkled	.10	.20	1.00	3.50
sorts; grows about 9 inches high, and is covered with well filled pods, often containing 7 or 8 tender sweet				
peas	.10	.25	1.50	5.50
*Nott's Excelsior. Robust and vigorous in growth, inclined to throw out laterals from the base of the stock, producing in profusion long handsome pods, closely packed with large peas of flavor. An improvement on American Wonder, being more vigorous and prolific with larger pods with more peas than either the "Wonder" or "Premiun Gem." A decided acquistion. Height 15 inches	.10	·35	2.50	8.00

PEPPER.

.10 .20 1.25 4.00

*Yorkshire Hero. A great, wrinkled variety of branching habits and fine flavor.....

The pepper is a tender annual, and should not be sown or planted out of doors untill settled warm weather. Sow seed in hot-bed in March or April, thinly, in drills four or five inches apart, and when three inches high, transplant in rows eighteen inches apart, and ten inches apart in the rows. For late crops, sow seed in the garden as soon as danger from frost is over.

One ounce will produce 2000 plants.

The "PLANET JR." No. 15 Single Wheel Hoe, Cultivator, Rake and Plow.

PRICE COMPLETE, \$6.00.

This new Wheel Hoe has the advantage of a high wheel with broad face, of a convenient arrangement of the frame, and a very full set of tools, most of them being of new, special design, such as have been found to perform wheel hoe work in the very best manner. It also has the great advantage of being convertible into a hill dropping and row seeder, by buying the seeder attachment. **Price**, \$4.50.

The tools are: a well-shapped garden plow, for plowing, marking out, covering and late cultivation; a pair of neat shield hoes, just right for hoeing in rows 9 to 12 inches, and with the assistance of a cultivator tooth or rake, rows up to 16 inches; a set of three hoes cutting 3½, 7 and 10 inches wide respectively, just right for 6, 9 and 12-inch rows, and, two together, for rows up to 16 inches. With two arranged side by side, the rakes are just the thing for preparing ground for the seed drill- It has also a practical leaf guard for fallen plants, such as peas, and for wide spreading plants. It raises the leaves and allows perfect cultivation, without injury or increased labor.

It is also sold without rakes and leaf guard. **Price**, \$5.00. Also plain, having only one pair of hoes and one pair of rakes. **Price**, \$.400.

The seeder attachment is quickly exchangeable for the wheel hoe frame; it is identical with the "Planet Jr." Hill Dropping Seeder No 4, and drops at 6, 9, 12, 18 and 36 inches apart. Price,\$4.50.

You do not want to fail to try the New tomatoes— New Imperial and Crimson Cushion, fully described in Catalogue under Tomato.

The Eclipse, pea will be a great acquisition in early peas, see description under head of peas, and give it a trial.

SPECIAL OFFER.

"The Family Money Maker."

Worth \$100 a year and more to all who own Land, a Garden, Orchard or Conservatory; covers, in plain language, by practical men, the care and cultivation of Flowers. Plants, Trees, Shrubs, Bulbs, etc., and tells how to make your Home Grounds attractive.

KAMERIBANKBARDENINEKS

An Illustrated Journal of Gardening and fruit Growing, and Record of Current Events in Horticulture: for the Professional Amateur. America's Brightest and Most Reliable Gardening and Family paper. Established 50 years.

ILLUSTRATED. EVERY SATURDAY. \$1.00 A YEAR.

No gardening paper published unites so systematically and thoroughly the beautiful with the needful, embracing all pleasure and profit in working the soil, elucidating all methods that tend to make it yield freely and its productions subservient to home and market. Our energies are directed to the well-being, in the country and suburbs. AMERICAN GARDENING fills all wants and includes all that is worth knowing.

FREE To every purchaser of us of \$1.00 worth of our SEEDS, at Catalogue prices.

To introduce it to new reader we will give a subscription to American Gardening for three months (12 numbers) as a premium to every purchaser from us of Seeds or Bulbs to the amount of \$1.00 or over. Subscriptions to be discontinued at the expiration of that time unless you notify the publishers to the contrary. This offer is for NEW NAMES only.

Address your orders to SETH WYMAN FIFE & Son, FRYEBURG, ME.

Premium on Flower and Vegetable Seeds in Packets.

The wide distribution of our Seeds being a special object, we offer the following inducements to parties forming Clubs, or to those who desire to purchase packets in quantity. These rates apply to Vegetable and Flower Seeds only when ordered in packets, purchaser's selection, cash to accompany order. Seeds ordered in this way will be sent post-paid to any address. Please note, that NO COLLECTIONS, or Seeds by WEIGHT, or MEASURE, are included in this offer.

NEW JAPANESE CLIMBING CUCUMBER.

The seed was originally brought from Japan by a Professor in the University of Halle, and has proven throughly adapted to open-air culture throughout Europe and also, so far as tested, in America. The vines are of healthy, vigorous growth, with rich, dark-green foliage, and throw out strong, grasping tendrils, which enable it to climb trellis, wire netting, brush, or any other suitable support. It clings so tightly that it is not prostrated by heavy storms of wind or rain. It comes into bearing quickly and continues to set the fruits abundantly throughout the season, while the climbing habit of growth enables the hanging fruit to grow perfectly straight; of large size, from twelve to sixteen inches in length, the cucumbers are thick, exceedingly tender, and of delicate flavor; of cylindrical shape, flesh pure white, skin dark green turning to brown and netted, when ripe. They are of good quality, and when young make attractive pickle.s Per pkt. Io cts.; per oz. 20 cts.

The "PLANET JR." No.8 Horse Hoe.

Probably no other cultivating machine is so widely known as the "Planet Jr." Combined Horse Hoe and Cultivator, for it is in use throughout the civilized world. It is so strongly built as to withstand incredible strain, yet it is light and easy to handle.

For 1897 we offer important improvements in our No. 8 "Planet Jr." Horse Hoe and Cultivator, as described below:

The Frame is longer than usual and about one and a half inches higher, making a tool that will not clog easily.

The Standards are formed up hollow with round throats of stiff steel; they polish quickly and free themselves readily from obstructions, and they clasp the frame and strengthen it.

The Depth is under perfect control by means of a new lever wheel and the new patented depth regulator, which are moved instantly in unison by a single lever, making exact work, steadying the machine and relieving the operator.

The Expander. This is an entirely new pattern, superior to all other forms; exceedingly strong, simple, accurate and positive in all positions.

Handle and Braces. These are also absolutely new and the most effective and stiffest combination known, at once making the tool rigid, yet allowing every adjustment of handles in height and sidewise.

Every part is perfected to make the tool acceptable to the intelligent farmer, who knows the best is always the cheapest

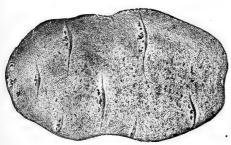

Price, \$8.00. Without Depth Regulator, \$7.50.

POTATOES.

Early Oxford. This potato resembles the Early Rose in shape, it is of a lighter rose color, grows uniform and smooth in shape, eyes not sunken; having been tried with other leading early varieties side by side. it gave a better yield of large, smooth potatoes with less small ones than the other leading varieties. As to quality it is

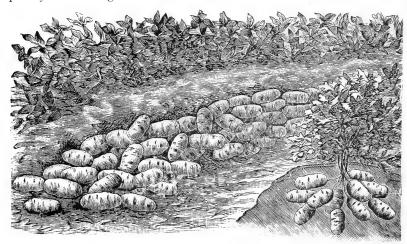

unequalled by any other early potato. It grows a large dark green leaf with a stout, healthy stock which all potato growers know is an indication of a good yielding po-Pk. Bu. Bbl. .40 \$1.00 2.25 Early Rose. The pioneer of all improved varities, and still highly esteemed..... 2.25 New Queen. A very early variety of execellent quality; pure white, produces very few small tubers..... .40 1.00 2.25 Early Albino. Is a new variety of great promise, first catalogued in 1887. Wherever it has been tested it has done extra well, and it seems from the reports received, to be the earliest and best variety now on the market. Everyone should get a few and try them, as they seem to be the coming early potato.... . 75 2.00 Burbank's Seedling. This medium early white introduced in 1876 has acquired a national reputation. Long SACO VALLEY: This new potato was originated by E. W. BURBANK, of

FRYEBURG, MAINE, and is named from the Valley of the Saco, in which Fryeburg is situated. This fertile valley is one of the best potato growing sections in Maine, and annually produces enormous crops.

The seed ball from which this potato was originated, was taken from the "BURBANK SEEDLING" and is a cross between the "BURBANK" and the "BEAUTY of HEBRON," and is the seventh year from the seed ball.

While it resembles the "BURBANK" in shape, and is an enormous yielder, outyielding the "BURBANK" by nearly one-third, when planted side by side with it, yet it has the fine qualities of the "Hebron" being white and floury, and excellent table variety.

It is a medium late variety, tops grow stout and stocky, and on good soil quickly cover the ground.

The tops are of a lighter green than other varities, and are very hardy, standing the potato blight and rot better than the common varities.

Potato growers will find this a grand potato for the market, growing smooth with nearly all good, sizable potatoes for the market.

It is a good keeper, keeping hard and firm till late in the spring, and produces very few small potatoes in a hill.

SPINACH.

Sow early in spring, in drills a foot apart, every two weeks for a succession, and as it grows, thin out for use. For fall use, sow in August, and for winter crop in September. Cover that which is left out over winter with straw or leaves, after the weather becomes quite cold. Keep clear of weeds.

One ounce to 100 feet of drill.

Pkt. Oz. $\frac{1}{4}$ lb Lb.

SQUASH.

Any good, rich soil is adapted to the growth of the squash. They only thrive well in a warm temperature, as all the varieties are tender annuals; and the seed should not be sown in spring until all danger from frost is past, and the ground is warm and thoroughly settled. The hills should be made from eight to ten inches in debth, manured well, and covered about three-fourths of an inch deep. Keep the

earth about the plants loose and clean, removing the surplus vines from time to time, allowing not more than three or four to a hill.

SUN FLOWER.

Large Russian.

Pt. .10 Qt. .15 also .08 per lb..

TOMATO (Liebes Apfel).

This is a native of South America. Nearly all our choice varities are of recent origin. The seed should be sown thinly, about the first week in March, in a hot-bed, greenhouse, or inside the window or sitting-room, where the temperature is never below sixty degrees. When the plants are about two inches high, set out in boxes three inches deep, four inches apart in the same temperature, or pot singly. If again transplanted before setting out, the plants will be still more socky. Set out in the open ground about the first of June, four feet a-

ground about the first of June, four feet apart each way, using a shovelful of rotted manure in each hill. Choose a sunny knoll and light sandy loam for early Tomatoes. If the vines are trained on a trellis, the fruit will be finen in every respect.

One ounce will produce over two thousand plants; two ounce	s will	l give 1	olants
enough for one acre.	Pk.	Oz.	Ld.

TURNIP. (German, Rube; French, Navet.)

For early use sow the small sorts as soon as the ground can be worked in the spring, in drills fourteen inches apart, the Ruta Bagas thirty inches. As the seed is very fine, it should be covered but slightly, excepting in very dry weather. Select light, if possible, new soil, and manure with plaster and ashes or phosphates. Should the young plants be troubled with insects, a sprinkling of the same will be found beneficial. Of the early varities thin the plants to six inches apart, and the Ruta Bagas to one foot. For fall and winter use the early kinds should be sown from the middle of July to the middle of August, and the Ruta Bagas from the middle of June to the first of July, using from one to one and a half pounds of seed to the acre. Turnips are extensively used as winter feed for cattle and sheep. "Swede" and "Ruta Bagas" being synonymous terms, the names below, given as they are generlly used, will be readily understood. The English varities are almost exclusively used for early planting for market.

One ounce to 150 feet of drill.

Pot, Sweet and Medicinal Herbs

Every garden should contain some of the following varities of herbs, both for culinary and medicinal purposes, as they are easily grown, and, which preserved by drying, are ready for use at any season of the year. Care should be taken to harvest them properly. Cut just before they are in full bloom, on a dry day and, after being thoroughly dried, they should be entirely excluded from the air. Sow in spring, in shallow drills, covering lightly, and when well up thin out or transplant to a proper distance apart.

The Zephanjah Breed weeder and Cultivator.

The most valuable farm tool now made. Its use means fields clean of weeds without hand hoeing or hand weeding. For all crops on the farm, in the garden or nursery. Indispensable to all who once use it. Saves 50 to 75 per cent. of the cost of cultivation. Its timely use increases crops, and is their salvation in times of drowth. Perfect satisfaction or we refund the money.

WHAT A FEW MAINE MEN SAY OF IT. MAINE STATE COLLEGE.

Orono, Me., August 16, 1894.

Gentleman: The Zephaniah Breed Weeder was used upon our potato field this year with much satisfaction. Used it first three days after planting, and once every four or five days after that. We have in past years used a smothing harrow for this purpose, but your weeder does much finer work. For level culture it is dispensable. Very truly yours,

Geo. M. Gowell, M. S.

I have used one of your weeders the present season and it has paid me well. I consider it a big improvement on any machinery that I have ever used for cultivating corn, potatoes, beans etc. My soil is a rocky loam. I also used it to work in grass seed and Hungarian, and like it very much for that. South Livermore, Maine.

I. O. Palmer.

I purchased one of your weeders last spring and it surprised me very much as it will do more and better work than I supposed it could. I used it on corn when 15 or 10 inches high without taking out any teeth and it works to a charm. Mine paid for itself this year in the amount of labor saved.

Bolsters Mills, Maine. Geo. H. Greene.

The weeder bought of you has given entire satisfaction. I have 3 acres sweet corn that I have not put a hand hoe into this season and it is looking finely. Have also used it in beans and potatoes and it did much better work than I expected. My land is quite stony but they do not bother it in the least. While my neighbors were sweating in the fields with a hoe I could sit in the shade and see them work for I could easily go over an acre with the weeder in from 45 to 50 minutes.

Hebron, Maine. C. L. Bray.

We have sold hundreds of weeders in Maine and New Hampshire and we have yet to learn of a farmer who is dissatished with it.

Remember that if you use the weeder as it should be used you can take the cxtra care of an acre of corn, potatoes or beans from 4 to 5 hours time between planting and cutting time, instead of 3 to 5 days the usual time required to do the same work with cultivators and hand hoes.

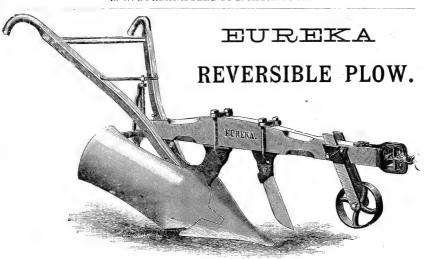

Do not fail to get a weeder for next seasons use, Write to us for circulars. Be sure to order

a weeder of us or your dealer.

Desk C. The Z. Breed Weeder Co..

26 Merchants Row.

Boston, Mass.

AUTOMATIC Locking Device, durable and reliable. The Plow is ready for work as soon as reversed, without taking the hands from the handles or stopping the team.

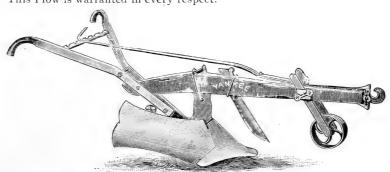

The Clevis is shifted as the Plow is reversed by a row passing under the beam, doing away with the various levers and handles now in use on other

Plows, so objectionable.

The loose Coulter cannot be clogged by roots or stones. Easily adjusted for turning a wide or narrow furrow by moving the crank on the end of beam. By moving the slotted caps that hold the clevis the Plow is easily adjusted

if the team does not work even.

This Plow is warranted in every respect.

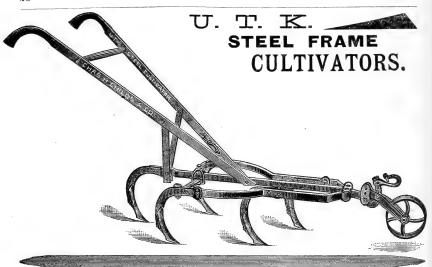

No. 2 H.—WITH COULTER.—NEW SERIES.
With Patent Spring Foot Latch, and having Jointers, Roller Coulters, Straight or Jointed Cutters.

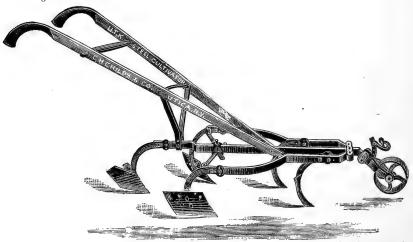

In this series the Latch is operated by the foot. By this arrangement, which is both simple and durable, the plow is ready for work soon as reversed without taking the hands from the handles or stopping the team.

A great improvement is the attaching the Foot Latch to back part of the Standard, so the handles can be removed for shipping, without disturbing

the latch.

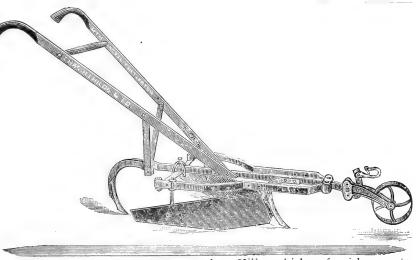

THESE cultivators are all made with extra long and extra heavy steel frame. They are of excellent finish, verv strong and durable, and being almost entirely of steel, are practically indestructible. The above cut resembles a Five-Tooth Cultivator with Reversible Points, which give double wear.

This Cultivator has Adjustable Hilling Attachment, which may be changed to throw more or less earth to the row, or the depth of cut altered by loosening one bolt; also our New Patent Lever Adjuster, which by a single movement of the arm will open or close the Cultivator, or coange its width o few inches at a time, as may be desired, without stopwing the horse. This Adjuster has been pronounced to be the finest one upon the market.

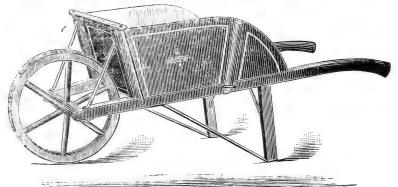

PRICE LIST

Plain Cultivator with 5 Teeth
Hilling Attachments, Extra,
Lever Adjuster, Extra

THE above cut represents our extra long Hiller, which we furnish separately or with Cultivator, as desired. The Hiller can be used upon any of our Cultivators of the style of framed represented above, except upon a Cultivator having the Wheel Lever.

U. T. K. GARDEN WHEELBARROWS.

THESE Barrows are so made that they can be knocked down and packed for shipping, when desired, thereby reducing freight charges and space for storage.

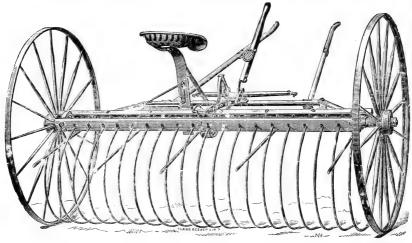

No. 2. Small. Handles, 4 ft. 1 1-2 in.; Body, 201-2 x r8 1-2 in.; 9 1-2 in. deep. Wood Wheel, 6 spokes, Price, \$4.00

No. 4. Medium. Wood Wheel, 6 spokes, Price, \$4.00.

Wood Wheel, 6 spokes, Price, \$4.00.

No. 6. Large. Handles, 5 ft. 10 in.; Body, 30 1.2 x 25 in., 12 in. deep. Wood Wheel, 6 spokes, Price, \$4.00.

"Tiger" Self-Dumping Wheel Rake.

It has a Steel Seat Spring and Steel Clearer Rods. The **new dumping device**. does away with the long hand lever. It is easily operated. The Rake Head, when desired, can be held up with the pressure of the foot, or by the short hand lever, and the Rake Head; after dumping, falls back with but little force, thereby preventing the breaking of teeth.

8 ft. Head, with 20 Teeth, combined Pole and shafts, Price, \$25.00 8 ft. "26 " 27.00

THE STANDARD HARROW COMPANY

makes a speciality of Harrows, and has every facility for producing the latest and most improved styles.
